

M

COMMENCEMENT DECEMBER 22, 1989

UNIVERSITY OF MARYLAND AT COLLEGE PARK

MARYLAND

PRESIDENT'S MESSAGE TO THE GRADUATES

Dr. William E. Kirwan became president of the University of Maryland at College Park in 1989.

My colleagues and I congratulate you on the successful completion of your studies. We are confident that your years at College Park have prepared you to take full advantage of the opportunities and challenges that lie before you. But it is not just you who have benefitted from your time at College Park. You have given much to us and for that we are extremely grateful. Your intellect and curiosity have challenged and stimulated us, and helped us—the faculty—to gain new insight into our disciplines. Your idealism and commitment to the common good have inspired us. And, your efforts and support of countless campus projects, committees, and service programs, have helped to make this a better institution than the one you entered several years ago. This is the miraculous property of the marvelous entity known as the university. The very act of separating something from it simultaneously leaves it replenished and richer. So we thank you for your part in helping us to grow.

Although we physically separate today, in a deeper sense our interdependence just takes a different form. Your success will be, in part, a measure of ours. And our success will be a source of pride for you and, perhaps, create new opportunities for you. We hope this interdependence will be reflected in your continuing interest and involvement in your alma mater.

Best wishes, much appreciation, and godspeed to each and every one of you.

WE Kirwan

William E. Kirwan
President

Cole Student
Activities Building

Graduating Senior

Dr. Kirwan

**Conferring of Doctoral,
Master's and Bachelor's
Degrees**

Dr. Kirwan

Benediction

The Reverend Elizabeth
Platz
Lutheran Chaplain

Alma Mater

HAIL! ALMA MATER
Hail to thee, Maryland!
Steadfast in loyalty,
For thee, we stand,
Love for the Black and
Gold
Deep in our hearts we
hold,
Singing thy praise forever,
Throughout the land.

Recessional

Symphonic Wind
Ensemble
Conductor, Mr. Wakefield

ORDER OF
CONVOCAATION
DECEMBER 22, 1989

The Great Seal of Maryland, first used by the university in 1922, bears the emblems of both the Calvert and Crossland family arms.

Following the Commencement Convocation, individual commencement exercises for colleges and schools will be held at several campus locations. Ceremonies are scheduled to begin at 11:30 a.m. and 2:00 p.m. Guests are urged to be seated approximately one half hour prior to the designated time for the ceremonies if they wish to observe the student and faculty procession.

Graduates, their families and friends, are cordially invited and encouraged to join with university officials and members of the faculty at the reception to be held in the Grand Ballroom of Stamp Student Union from 11:00 a.m. to 3:00 p.m.

Shuttle bus service is available providing free transportation across the campus throughout the day.

Cole Student Activities Building

- 9:30 a.m. Campus-wide Commencement Convocation
- 11:30 a.m. Business and Management Commencement
- 2:00 p.m. Behavioral and Social Sciences Commencement

Hornbake Library Assembly Room

- 11:30 a.m. Library and Information Services Commencement

Memorial Chapel

- 11:30 a.m. Computer, Mathematical and Physical Sciences Commencement
- 2:00 p.m. Agriculture and Life Sciences Commencement

Physical Education, Recreation and Health Building

- 11:30 a.m. Physical Education, Recreation and Health Commencement

Reckord Armory

- 11:30 a.m. Education Commencement
- 2:00 p.m. Engineering Commencement

Stamp Student Union-Colony Ballroom

- 11:30 a.m. General Studies Commencement

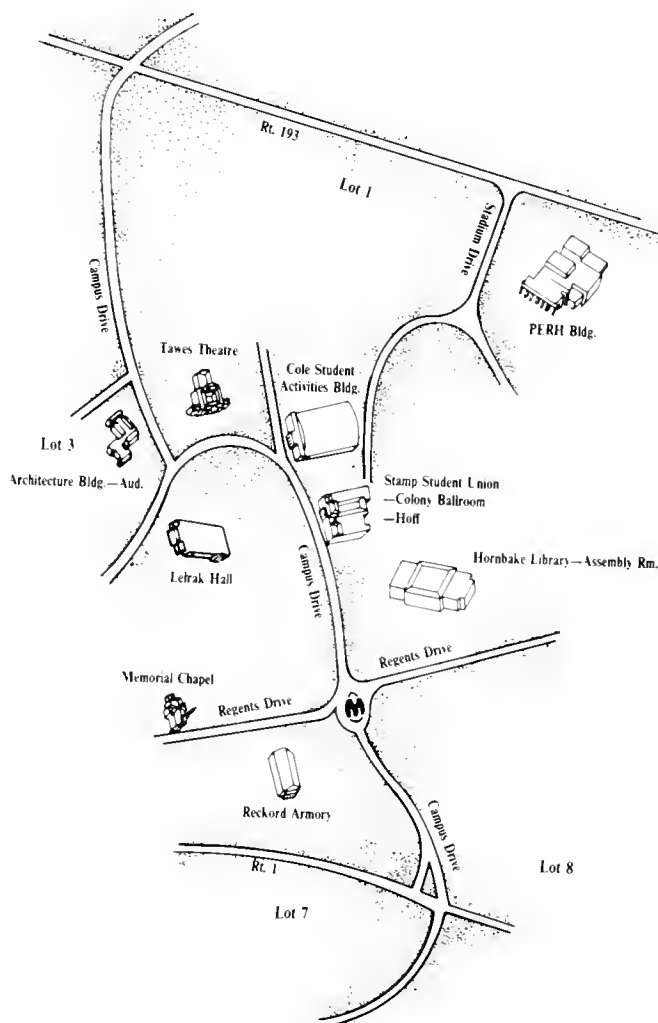

Stamp Student Union-Hoff Theatre

- 11:30 a.m. Human Ecology Commencement
- 2:00 p.m. Journalism Commencement

Tawes Theatre

- 11:30 a.m. Arts and Humanities Commencement

SCHEDULE OF EVENTS

The Campus

College Park is the tenth largest university campus in the nation in enrollment. In Fall 1989, undergraduates numbered 26,863 and graduate students 8,962 for a total enrollment of 35,825. This year's College Park operating budget is about \$518 million, including financial aid for some 13,800 students.

Students can choose from more than 120 undergraduate and 85 graduate programs leading to degrees. In 1988–89, the campus awarded 5,586 bachelor's degrees, 1,284 master's degrees, and 391 doctorates.

History

The University of Maryland was founded in 1807 in Baltimore as a faculty-owned College of Medicine. Five years later, the growing institution was renamed the University of Maryland. The Baltimore College of Dental Surgery, the first dental school in America, became a part of the university in 1840. Later, the university opened schools of pharmacy, law and nursing.

In 1859, the Maryland Agricultural College, which would evolve into the College Park campus, was opened in Prince George's County under a charter secured in 1856 by a group of Maryland planters. This institution became one of the nation's original land-grant schools in 1865. After a disastrous fire on the campus in 1912, the state acquired control of the college and rebuilt it.

In 1920, the state legislature joined College Park with the professional schools in Baltimore to form an expanded University of Maryland. These schools were later grouped with the Baltimore County and Eastern Shore campuses and University College.

July 1, 1988 marked the dawn of a new era in higher education in the State of Maryland when a reorganization of the state's public universities and colleges mandated by the Maryland legislature went into effect. As a result, the five campuses comprising the former University of Maryland were merged with six institutions governed by the Maryland Board of Trustees of State Universities and Colleges to form the new University of Maryland System. The law that created the new system designated College Park as the state's flagship institution.

THE COLLEGE PARK CAMPUS AND THE UNIVERSITY

Charles B. Calvert was one of the founders of the Maryland Agriculture College which later became the University of Maryland. Deciding that commercially sold bricks were too expensive, he set up a kiln to produce his own, and on August 24, 1858, he laid the cornerstone for the first building on the campus.

Libraries

The libraries at College Park include approximately 2 million volumes, 22,526 subscriptions to periodicals and newspapers, and more than 4 million pieces of microform. College Park offers the largest university research library in the Washington area and is an important resource for the state and local community.

Research Facilities

College Park is the home of a variety of exceptional research facilities including a computer vision laboratory; a full-scale low velocity wind tunnel; a 500 liter computer-controlled fermentation system for research in bioprocess scale-up programs; the Center for Automation Research; and a quiescent plasma device (Q machine) for plasma research. Such major facilities as the Engineering Research Center, the Systems Research Center, and the new Center for Global Change conduct research that is especially significant to the state and nation.

The Engineering Research Center is a major vehicle for extending the technical and research expertise of the University of Maryland to businesses and industries through Maryland. The center is both a catalyst for problem-solving and a clearinghouse for technical information resources.

The Systems Research Center conducts research in systems engineering, artificial intelligence and computer-aided engineering. Supported by a 5-year, \$21 million National Science Foundation grant, the center operates in conjunction with a program at Harvard University and complements a nationally recognized campus program of basic and applied research in computer science.

In 1989, the Center for Global Change, funded with a \$1.8 million Environmental Protection Agency grant, was created at College Park. Under the auspices of the center, researchers from a variety of fields conduct groundbreaking research related to such important issues as global warming, ozone depletion, and sea-level rise.

In the 1990s, College Park will be the home of one of the nation's most important research facilities—the 1.7 million square-foot, \$205 million Second National Archives Build-

ing. The building will house more than half the collection of the National Archives Records Administration, including some of the nation's most valuable historical documents, such as the entire State Department record, 11 million charts, maps and photos, and documents from World War II and the Vietnam War. The building is scheduled for completion by Fall 1993.

The proximity of the campus to national research institutions such as the National Institutes of Health, the Smithsonian Institution, the USDA Beltsville National Agricultural Research Center and National Agricultural Library, and the Library of Congress ensures that prime research facilities are always available to the university's faculty and students.

College Park Alumni Association

Created July 1, 1989, the College Park Alumni Association is designed to strengthen ties between the university and its graduates and to foster support for the University of Maryland at College Park. All graduating seniors and successful master's and Ph.D. candidates receive a 1-year free membership in the association.

The Graduates

Students graduating today from the University of Maryland at College Park follow in the footsteps of many notable alumni who have distinguished themselves in such fields as science, entertainment, arts, journalism, business, law, medicine, and government.

As a graduate student in mathematics at College Park, Herbert A. Hauptman (Ph.D. '54) worked simultaneously at the Naval Research Laboratory to devise a method for mapping three-dimensional structures of molecules. Three decades later he and Jerome Karle, his long-time collaborator at NRL, won the 1985 Nobel Prize in Chemistry for their pioneering research. Dr. Hauptman was awarded an honorary Doctor of Science degree by the university in 1985.

CBS News' Connie Chung ('69) worked on the *Diamondback*, the university's student newspaper, and for WMUC, the campus radio station, during her student years. Another successful journalist who received his collegiate training at College Park is Pulitzer Prize-winning science writer Jon Franklin ('70). Franklin, who won two Pulitzer

Prizes for his work as a *Baltimore Evening Sun* reporter, currently heads the journalism program at Oregon State University.

One of the university's most devoted sons is A. James Clark ('50), president of the George Hyman Construction Co. and president and chairman of CEI Construction Inc., the umbrella organization for engineering and construction companies that include OMNI and Hyman. A former member of the university's Board of Regents, in 1983 Clark made a major contribution to the College of Engineering that led to the establishment of the A.J. Clark Chair in Construction Engineering and Management.

Other notable alumni include Carmen Balthrop ('71), a former Metropolitan Opera star and currently assistant professor of music at College Park; George V. McGowan ('51), president of Baltimore Gas and Electric; Karl W. Meyer ('49), president of University of Wisconsin, Superior Campus; Rep. Tom McMillen ('74), Maryland's Fourth District Congressman; Mary Stallings Coleman ('35), the first woman elected to the Supreme Court of Michigan; Fred O'Green ('49), retired Curator of Textiles, Smithsonian Institution; James R. Buckler ('70) current director of the Smithsonian's Office of Horticulture; Rep. Steny Hoyer ('63), Maryland's Fifth District Congressman; Anne Truax Darlington, creator of "Wall Street Week" and current director of the International Production Group for the Maryland Center of Public Broadcasting; and Allen J. Krowe ('54), senior vice president and chief financial officer of Texaco.

Academic Costume

The black caps and gowns worn by the students and faculty in the academic procession have been the traditional costume of scholars since medieval times. They probably represent a kind of ecclesiastical dress, since many of the scholars of that period were members of monastic orders.

Most colleges and universities in the United States have adopted the uniform code for costumes drafted by an intercollegiate commission in 1893. Each of the three academic degrees—bachelor, master and doctor—has its own distinctive gown and hood. The bachelor's gown has a longer, more narrow, closed sleeve extending below the

knee; the arm fits through a slit at the elbow. The doctor's gown has a full, bell-shaped sleeve trimmed with three bars of velvet. The velvet trim on the gown can be black or a color indicating the wearer's general field of learning—for example, green for medicine or purple for law. A list of department colors follows.

Agriculture/Maize
Arts, Letters, Humanities/White
Business Admin., Com. Sci./Drab
Dentistry/Lilac
Economics/Copper
Education/Light Blue
Engineering/Orange
Fine Arts, Architecture/Brown
Forestry/Russet
Home Economics/Maroon
Journalism/Crimson
Law/Purple
Library Science/Lemon
Medicine/Green
Music/Pink
Nursing/Apricot
Oratory, Speech/Silver Gray
Pharmacy/Olive
Philanthropy/Rose
Philosophy/Dark Blue
Pub. Admin., For. Ser./Peacock Blue
Public Health/Salmon
Physical Education/Sage Green
Science/Golden Yellow
Social Work/Citron
Theology and Divinity/Scarlet
Veterinary Sciences/Gray

The most colorful and distinctive part of the academic costume is the hood extending down the back. The doctor's is the largest of the hoods and the bachelor's is the smallest. The bachelor's hood is often omitted.

Silk lining of various colors in the center of the hood indicates the college or university which conferred the degree. Consistent for all degrees is the cap, or mortar board, which has a tassel of black or another color indicating the field of learning. The tassel of the doctor's cap can be gold.

Academic Degrees

A degree is awarded for the successful completion of a course of study. Nationwide, there are more than 1,600 different academic degrees conferred by colleges and universities. The first known degree was a doctorate bestowed by the University of Bologna, Italy, in the mid-12th century. Originally, the doctor's and master's degrees were used interchangeably, each indicating that the holder was qualified to

instruct students. The bachelor's or baccalaureate, degree only indicated entrance into a course of study preparatory to the doctorate or mastership. Gradually, though, the bachelor's degree came to mean successful completion of one level of study in advance of the higher degrees.

The Doctor's Degree

The term "doctor," meaning teacher or instructor, originated with the ancient Romans for those who lectured publicly on philosophical topics. During the Middle Ages, it was used as a title of honor for men of great learning. It was first made an academic title at the University of Bologna, which was allowed by the emperor to appoint *doctores legum* (doctors of laws). The University of Paris followed suit in the year 1145. Soon after, popes granted the universities the right to appoint doctors *canonum et decretalium* (teachers of the canon law) and, when the study of civil law was combined with that of the canon law, the title was changed to doctor *utriusque juris* (teacher of both laws). The faculties of theology and medicine followed that of law in conferring this title.

A doctorate is given beyond the baccalaureate degree and requires several years of advanced study, the successful completion of a thesis or dissertation, and written and oral examinations. The doctor's degree represents the most advanced earned degree conferred by American institutions. There are two distinct types: the practitioner's degree and the research degree. The first type represents advanced training for the practice of various professions, principally Doctor of Medicine, Juris Doctor and Doctor of Pharmacy. These degrees carry no implication of original research. The University of Maryland awarded the first two dental degrees in history on March 9, 1841, and invented the name of the degree, Doctor of Dental Surgery (D.D.S.).

The second type is a research doctorate representing prolonged periods of advanced study. A dissertation which usually accompanies the study is intended to contribute substantially to existing knowledge on the subject. The most important of these, the Doctor of Philosophy, no longer has an implication of philosophy for its holder, but represents advanced research in any of the major fields of knowledge. It was first awarded in the United States in

1861 by Yale University. The University of Maryland awarded a Ph.D. for the first time in 1920.

The Master's Degree

The master's degree is an academic honor bestowed upon students who have successfully completed work beyond the baccalaureate. A thesis and an oral examination are usually required. The word *magister* was used by the Romans as a title of honor, but its present meaning can be traced to the establishment of the oldest universities. Organized faculties as they now exist in universities were not known then; academic activity was limited to seven liberal arts. Those who were honored for their diligence and knowledge upon completion of their studies and who had already received the bachelor's degree were called *magistri artium* (master of the liberal arts). In 1920, the University of Maryland awarded its first Master of Arts (M.A.) and Master of Science (M.S.) degrees in fields other than agriculture.

The Bachelor's Degree

The bachelor's degree represents completion of a four-year course of college-level study and is the oldest academic degree used by American institutions of higher learning. It was first conferred in America in 1642 on the first nine graduates of Harvard College. Maryland Agriculture College, which later became the University of Maryland at College Park, awarded its first Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) degrees in 1862.

Marian Wright Edelman, founder and president of the Children's Defense Fund, has been a passionate and successful advocate for disadvantaged Americans throughout her entire professional career.

Under her skilled leadership, the Washington-based Children's Defense Fund has advanced vital causes on a wide range of children's and family issues, including adolescent pregnancy prevention, education, child care, youth employment, child welfare, and children's physical and mental health.

Edelman first focused on the plight of children in the mid-1960s when, as the first black woman admitted to the Mississippi bar, she directed the Legal Defense and Education Fund of the National Association for the Advancement of Colored People in Jackson, Mississippi. In that role the attorney successfully defended the Child Development Group of Mississippi, the state's Head Start program, against political attacks.

In 1968, Edelman took on the cause of children in direct fashion by founding the Washington Research Project, an organization that in 1973 evolved into the Children's Defense Fund. Growing steadily in influence and stature since its creation, the group today is one of the nation's leading advocacy groups. Among its most visible initiatives is its national campaign, started in 1983, to prevent teenage pregnancy and provide positive life options for youths.

In 1971, *Time* magazine named Edelman as one of America's 200 young leaders, and in 1985 she became a MacArthur Foundation Prize Fellow.

Edelman serves on the prestigious Council of Foreign Relations and the boards of the NAACP Legal Defense and Education Fund, the Aetna Life and Casualty Foundation, the March of Dimes, and Spellman College Board of Trustees.

Edelman was born in Bennettsville, S.C. and was graduated from Spellman College in 1960. She received her law degree from Yale University in 1963. She is married to Peter Edelman, a professor of law at Georgetown University and has three sons.

Today, for her extraordinary commitment to the disadvantaged members of society, her effectiveness in public-spirited causes, and her lasting contribution to the common good of the nation, Marian Wright Edelman receives the honorary degree of Doctor of Public Service from the University of Maryland at College Park.

CANDIDATES
FOR GRADUATE
DEGREES
DECEMBER 1989

This decorative bull's eye window graces the front pediment of the Reckord Armory. Built in 1944, the "New" Armory, as it was then called, was the first used for commencement exercises on June 27, 1945.

Doctor of Philosophy

Mahmoud Ali Abdelnabi Poultry Science
Neurochemical and Hormonal Determinant of Sexual Differentiation

Mohamed Bassam Mahmoud Aboul-Nasr Botany
Studies on Baccharis Coridifolia - Myrothecium Species Interaction

Lawrence Paul Adamczyk History

Irene Cheryl Berman-Levine Human Nutrition and Food Systems
Food-Purchasing Patterns of Food Stamp Participants in Dauphin County, PA

The December 1989 class roster comprises degree candidates from the undergraduate and graduate programs at the University of Maryland at College Park. As final action cannot always be taken for candidates by the time this program is printed, the list of candidates here is tentative only. The university reserves the right to withdraw or add names. Diplomas (for other than doctoral degrees) will be mailed by the Office of Records and Registrations.

SCHOLARSHIP HONORS

Bachelor's degree candidates who have qualified for scholarship honors upon graduation are designated by appropriate symbols adjacent to their names within the alphabetical listings of colleges or schools.

To be eligible for consideration for such honors a candidate must meet the following general criteria: (1) have completed at least 2 years of work at the University of Maryland (60 semester hours, 30 of which were earned at the College Park Campus) and (2) have a scholastic average of B (grade point average of 3.000) or higher in University of Maryland work prior to the last semester of registration before award of degree.

August and December 1989 candidates who have met these criteria are shown in the listings as qualifying, upon graduation, for the designators *Summa cum Laude* (if they ranked in the top two percent of the candidates in their respective colleges or schools), *Magna cum Laude* (if in the next three percent), or *cum Laude* if in the next five percent), based on the grade point averages of students in the preceding three graduating classes of their degree-granting unit.

General Honors Program

General Honors

Joel Fredric Plotkin

Departmental Honors

With High Honors in:

Biology

Mehrdad Mazlumzadeh
Julia Marjorie Merry

Criminal Justice

Geoffrey Carroll Barnes**

English

Laura Jane Bellows-Ancasi

Physics

Alberto Adolfo Pinkas***

Zoology

George Albert Wilkinson III**

With Honors in:

Biology

Dolores Ibarreta

Computer Science

Joanne Paula D'Souza
James David Hobbs

Engineering

Robert Louis Blondell***
Alireza Ghassemian
Melinda Dee Godwin
James G. Mattern

English

Patricia Marie Schwartz***

French

Melissa Meredith Saurman**

Physics

Brian David Martin

Psychology

Alicia Ann Stephany

Textiles and Consumer Economics

Melanie Richardson Cook

Zoology

Brian Patrick Brooks**
David Howard Plotkin**
Naomi Leah Ruff

** Graduated May 1989

*** Graduated August 1989
